# How we get started back in 2011

- Education – 2 years programme in DK
  - Study groups across our units
  - Expectations about using new skills and implementing
- The local managers
  - Education
  - Plan for implementation

- Challenges
  - Few employees separated at different units around the city
  - Difficulties to coordinate date and time that fits all of the invited people
Project launched by the board of social affairs

- 2014-2016
- 5 municipalities testing OD networksmeeting to improve the efforts in the mental health care system
- Frames and conditions:
  - Training programme inclusive supervision
  - Follow the manual
  - Evaluationprogramme with questionnaires, interviews and video recordings (external company)
  - Colaboration with the psychiatric hospital
  - 50 citizens with psychosis and serious social disabilities having min. 2 networkmeetings
- Preparation inspired by a theory of implementation: management, organization and human ressources (Dean Fixen)
DIALOG
The project-organization in Aarhus

- Advisory board (meets 2-3 times a year):
  - Managers from own agency and the unit for visitaion (appropriation)
  - Project manager
  - the psychiatric hospital: the manager and the project employee
  - 2 persons from organizations for peers and relatives

- Project group (meets every month):
  - 2 employees from 5 different units
 - 1 employee from the psychiatric hospital
  - 2 project managers

The manual

- Not strictly
- *"can not be used without training....."*
- Built on the values and 7 principles of Open Dialogue
- How to plan, facilitate and follow up
- Checklists
- Tools

Flow model

Network meetings – in our context

- Open Dialogue network meetings and dialogical practice

- The 7 principles – a bit differences:
  - Immediately help > quick help
  - Mobility and flexibility – with some limits

- Coordinator – a local employee:
  - Motivate and take action on a wish for network meeting
  - collaborate with the citizen about planning
- Facilitators – local project officers with OD education
- Interviewer / reflecting team – 1 or 2 employees with OD education

# Dialogical practice – a way to meet people

- Be present and listen

- Curious

- Making questions to the meaning of important words

- Less searching for solutions

- Wait with taking actions

- Doing reflections

- Being transparent
Challenges

- To explain what is OD and why
  - We need commitment among collagues and other professionel network. They say: "*We already have open dialogue*"
  - Motivating citizens to participate, when they say: "*A meeting … no thanks!*"

- Doubt about the citizens abilities to participate
- Uncertain to use the new skills to facilitate network-meetings
- Difficulties to coordinate date and time that fits all of the invited people
Implementing Open Dialogue in Belgium

- What are your own doubts, assumptions, preconceptions etc. ?
  - About your own skills
  - the citizens
  - the private network
  - The professionel network
  - Or?
- Don't search for agreement or common understanding
- Listen and be curious

Just do it – and continous attention

- Try - learning from experiences
- Enrol to feel the difference
  - Meetings for employees, managers, advisory boards
  - Meeting with citizens (Pernille)
  - Daily talk
  - After conflicts

- Listen to various perspectives
  - What is the doubts and challenges
  - What is the assumptions and preconceptions
  - What is the good experiences
- Putting on the agenda
- Continous developing how to understand and use Open Dialogue
Collaboration across the mental health care

- Telling the good stories – again and again
- The head manager is our ambassadeur – at the level of managers
- Enrol and show them
- How to start at the psychiatric hospital
- From 1 unit to more

- Takes time and education
  - 5 other agencies in the municipality
  - 1 unit at the psychiatric hospital
  - Business plan for Social Services in Aarhus 2018-2020
a short break…..

- *"Usually you only get a time to show up to a meeting on the terms and conditions of the municipality. And talk about what they have already decided to talk about, from the perception that they already know who I am. With Open Dialogue, I get the opportunity to talk about **what I would like** to talk about and express **how I would like** to develop".*
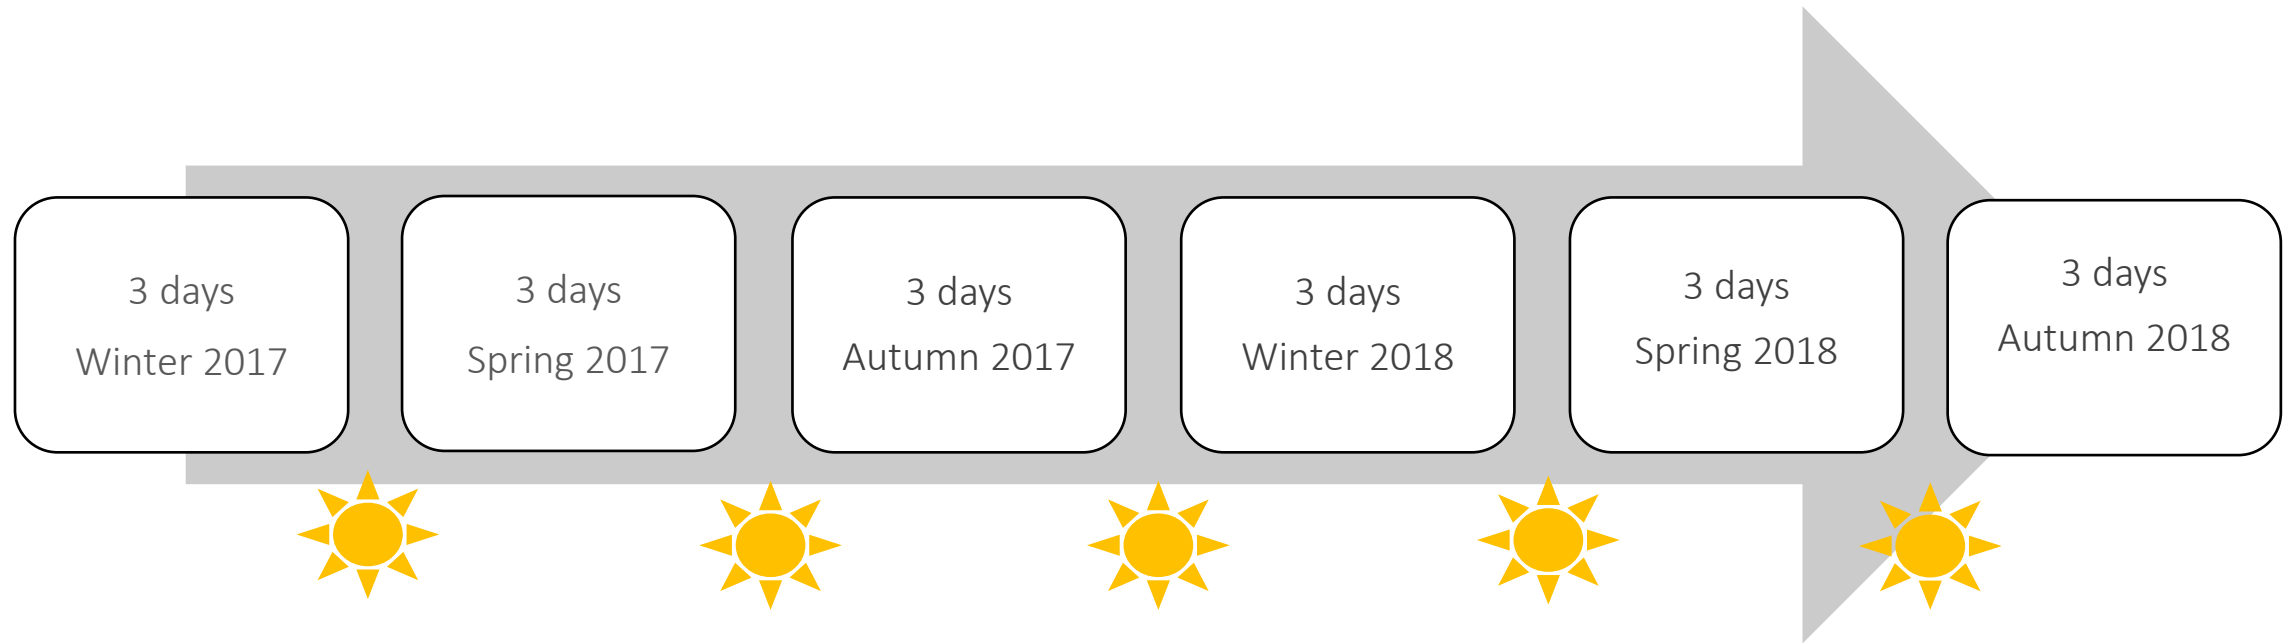

What have we learned...about learning Open Dialogue?

- Reflections from developing / facilitating learningprocesses
 in a Danish clinical / organiztional context

What we have learned…about learning Open Dialogue?
- reflections from the 2 year education in Denmark

Learning by head, heart and hands...

|			
Skills (hands)	Reinforce	...	Refine
Understanding (heart)	Explore	...	Develop
Knowledge (head)	Introduction	....	Insight

Learning by practice, theory and embodyment...
- focus on both the person and the organization...

Our learningprocess...
- reflections from developing and facilitating...

- Balancing and supporting learning by the head, the heart and the hands! More philosofical base sound! More stories from practitioners who can inspire! More hands on training and feedback!

- Helping the practitioners (and the organisations) to practice, practice and practice and support the possibilities to practice and have dialogical feedback!

- There is no 'quick fix' - the learning process for both the person / practinioners organisations take time (embodyment)!

- Translating the 'world-wide-work' into nation-wide and local processes / practice   is connected with both possibilities and bounderies!

- Facilitating learning processes - in the field of open Dialogue - is closely connected with the work within the field of Open Dialogus: we must invite, facilitate dialogues, reflective processes support polyphony and 'embody' the values we work with and from...
